Providence, R I 02908

23 December 1985

Mr. Michael Davenport
Naval Education & Training Center
Department of Public Works
Newport, RI 02841-5000

Dear Mr. Davenport:

This letter will summarize the results of our meeting on 12 December 1985 in our offices in Providence. Participants included Robert Hoffman of ERA, Michael Powers and Michael Sherrill of GZA, Michael Mulhare of DEM/Water Resources, Stephen Majkut and John Hartley of DEM/Air and Hazardous Materials, and you and me.

The subject of the meeting was the closure plan for Tanks 53 and 56 in Tank Farm Five at NETC. We discussed the installation of an additional three or four groundwater monitoring wells to determine whether any significant contamination is migrating away from the tanks. The actual number of wells will be dependent on sampling results. You proposed that a closure plan satisfying the requirements of 40 CFR 265 Subpart G be submitted to this office by 21 March 1986.

This schedule is acceptable to this office. If you have any questions, please call me at 277-2797.

Sincerely,

Thomas A. Epstein,
Senior Engineer
Division of Air & Hazardous
Materials
